

The following is a shared statement from all Stevenage Headteachers:

Students across Stevenage have worked incredibly hard this year to achieve success in their examinations. We are all very proud of them.

Stevenage Headteachers will not be publishing overall statistics, but are instead celebrating individual students' achievements.

The Thomas Alleyne Academy were celebrating the results of their students' hard work today with some excellent results. Headteacher, Mark Lewis, said "our students have lots to celebrate following the great results they have received this morning. They have done so well and we wish them all the best as they begin the next steps towards their future destinations."

George Lovelock has done particularly well this morning, gaining A*A*AA grades in maths, further maths, computer studies and physics. George will be off to Durham university in September to read maths. He said 'This is exactly what I've been hoping for and I'm very, very happy with my results. I'm really excited about starting university soon'. Tom D'Gama has also achieved the grades he needed and has accepted his offer from Leicester university, where he will be reading physics after receiving AAB in physics, maths and computer studies for his A-levels. Tom said 'I'm so relieved that the stress of waiting for these results is finally over. The hard work of the last two years has all been worth it.'

Gray Hammond, Rose Bigley and Millie Wardle are also delighted with their exam results. Gray achieved A*AA in biology, chemistry and maths and will be going to Swansea university for a four year course in zoology, which will include a placement year. Gray said 'All my hard work has paid off and I can't wait to begin my course in Swansea next month'.

Rose gained ABB for her maths, chemistry and biology A-levels and has secured a science laboratory degree apprenticeship. Rose is 'absolutely chuffed' with her results and is really looking forward to starting the next chapter of her studies in a couple of weeks' time.

We are also very proud of Millie, who received a distinction* in sports studies, alongside A grades in both biology and chemistry. Millie has accepted a deferred place at Anglia Ruskin university, where she will be reading biomedical science in September 2025 after her gap-year. Millie said 'I'm over the moon with the grades I have achieved this morning. We'll all be celebrating together this evening!'.

Arthur McDowell has received exceptional grades today too, with A*AA in biology, chemistry and maths. This has secured his place at Imperial College London, where he will be reading biology. Arthur is interested in pursuing a career in the pharmaceutical industry and said this morning 'I'm really looking forward to starting at university soon and am so pleased with how well I've done today'.

Ben Palmer has secured a research development biologist apprenticeship with GSK following his amazing results today, achieving a distinction* in BTEC sports studies alongside an A-grade in

biology and a B-grade in chemistry for his A-levels. Ben said 'thank heavens the wait is finally over - I can finally sleep well now! I'm delighted with how well I've done. Thank you so much to all my teachers for supporting me over the past two years. I can't wait to start my apprenticeship soon now that I've got the grades I needed.'

Jack Milner has done well too, gaining ABC for his A-levels in maths, computer studies and physics. Jack will start his degree in computer science at the University of Hertfordshire next term and he said this morning: 'I'm so excited to start the next chapter of my studies soon. I love coding and can't wait to begin the course.'
